

# Sample EVS Study Material

## Environmental Conservation and Sustainability

Environmental conservation is the protection and preservation of natural resources and ecosystems.

### Major Environmental Issues:

1. Climate Change: Rising temperatures due to greenhouse gases
2. Pollution: Contamination of air, water, and soil
3. Deforestation: Loss of forest cover
4. Loss of Biodiversity: Extinction of species

### Conservation Methods:

- Reduce, Reuse, Recycle: Minimize waste
- Plant Trees: Combat deforestation
- Save Water: Conserve precious resources
- Use Renewable Energy: Solar, wind, hydro power
- Protect Wildlife: Preserve habitats

### Individual Actions:

1. Turn off lights when not in use
2. Use public transport or carpool
3. Avoid single-use plastics
4. Compost organic waste
5. Support eco-friendly products

Remember: Small changes in daily habits can make a big difference in protecting our planet for future generations.
